

Food Safety • Product Innovation • Sustainable Sourcing

At Harris Spice, our mission is to source and distribute the finest spices and herbs. The spices and herbs we process — for our retail, food service, or industrial customers — meet the highest standards established by the industry.

Harris Spice Points of Difference

Sustainable Sourcing

We source our spices from over 45 countries and develop close relationships with trusted vendors. We work with local government organizations, international NGOs, and many origin stakeholders and growers to establish sustainable farming practices — such as minimal use of pesticides and techniques that support biodiversity.

Custom Blends & Seasonings

Our expert team of R&D specialists and experienced culinary consultants can partner with you to develop unique custom seasonings and blends to your specifications. Complete with a test kitchen, small batch pilot test plant, and a variety of packaging formats, we are prepared to create new products from concept to commercialization.

Superior Flavor

All our spices go through an intensive cleaning process to remove harmful foreign matters and adulterants. We also use a natural and validated steam-based sterilization process. The controlled process ensures effective microbial reduction and pathogenic eradication while protecting natural flavor properties like enzymes, antioxidants, and volatile oils.

Quality & Food Safety

We conduct Physical, Microbiological, and Chemical Analysis on all our products and maintain traceability from raw ingredients to finished product. Our plants undergo rigorous environmental testing as well as government and 3rd party audits & inspections throughout the year.

Service

We offer our customers the convenience and safety of local production from our modern, dedicated spice and herb facility in Anaheim, California.

Marketing & Creative

Our in-house marketing and creative team can provide marketing insights and data, as well as packaging design, creative marketing and branding solutions.

Harris Freeman Foundation

With a simple vision of making a difference, we started the Harris Freeman Foundation, a non-profit organization that provides philanthropic services and monetary donations to aid under-developed communities, victims of natural disasters, and other supporting advocacy organizations.

Our mission is to impact the lives of source farm communities through a multi-pronged approach, with focused commitment to three critical areas:

HEALTH

SAFETY

EDUCATION

We support our farm communities through direct financial contributions and development projects, as well as sustainable production practices with respect for the environment.
